

 **TRANSLYFT**®

**When your
building
needs a lift**

Everything in one place

Let's be honest: Lifting solutions may not be what you deal with the most. Therefore, it's good news that **you now only need to contact one company to solve all your needs for lifting solutions.**

Two of the leading companies in the European market for lifting technology are the Danish company Translyft and Spanish Hidral.

While Translyft are specialists in all types of lifting tables and other solutions that can contribute to improving the working environment, efficiency and hygiene in production environments, Hidral are specialists

in developing larger elevator solutions for moving people and goods both on the inside and outside of buildings.

So now you only need to go to one place to solve all your needs for lifting solutions.

In other words, the new partnership makes life easier for architects and other consultants.

TRANSLYFT®

HIDRAL

WORLDWIDE LIFTING SOLUTIONS

New solutions in our portfolio

With the new partnership, we are now able to offer solutions **regarding both lifting tables and larger lifting solutions such as goods and vehicle lifts.** Regardless of whether you need a lifting solution for factory buildings, cultural institutions, educational institutions, office buildings or other, we can now provide more lifting solutions than ever before.

Goods lift with attendant

This lift allows the people responsible for the handling of goods to travel with the platform.

Goods lift

Transport your material from one level to another in an efficient and safe manner.

Vehicle lift

Transfer a car or other vehicles between levels - e.g. for apartment buildings or offices with parking garages.

Accessibility lift

Ensure accessibility for people with disabilities in areas with stairs.

Current solutions in our portfolio

Reception & Despatch

It goes without saying that **mechanical lifting** and **compensation of level differences** are often needed in case of both reception and despatch.

Production & Assembly

In production and assembly it is important to balance **difference in levels, integrate work stations, optimize workflow** and ensure the right ergonomic position for the employees.

Packaging

When you package your goods, it is very important that the **room is optimally utilized**, that it is **easy to manoeuvre** with materials and that the work stations secure **ergonomically correct lifts**.

Storage

In a warehouse or storage room it is crucial that you can easily **reach materials on more levels** and thereby **utilize the storage room** most efficiently.

Loading Bay

For smaller level differences, e.g. between the vehicle and the permanent loading ramp.

Work Platform

For lifting people and materials. Get access to difficult places and improve work conditions.

Superlow

Ideal for manual handling. Has a low closed height so no pit is required.

Goods Lift

For the high lift situations with lifts between different levels and mezzanines.

Superlow

Ideal for manual handling. Has a low closed height so no pit is required.

Single Scissor

For the simple tasks that matter, like bringing goods to the most ideal height for the employee.

Pallet Lifter

For optimization of workflows with a design that provides great accessibility.

Double Vertical Scissor

For use as a lifting table between different floors – with a lifting height of 4,500 mm

Pallet Lifter

For optimization of workflows with a design that provides great accessibility.

Double Horizontal

For lifting long items and doing heavy duty lifting. It's simple but effective.

Lifting table with roller conveyor

For e.g. packaging lines to improve production flow.

TLG

Ideal for easy pallet handling and a better flow. The TLG is the efficient choice.

Why is the right lifting solution **important for you?**

Finding the right lifting solution isn't always easy, but it's important. Because the right lifting solutions **can optimize your work process and increase and improve the value of a building** on a wide range of parameters:

Accessibility

Our products are designed to increase accessibility meaning that we e.g. produce handicap friendly solutions in building projects.

Everything in one place

The partnership between Translyft and Hidral means that you only need to get in touch with us and we will take care of the rest.

Ergonomics

The right lifting solution can reduce the number of back injuries and lost workdays, while increasing employee satisfaction and efficiency.

Efficiency

Efficiency is crucial in any company, and we develop lifting solutions that saves you time and money.

We develop unique **lifting solutions**

At Translyft we know that every lifting solution is unique, because each company has its own work processes, and each station its special functionalities. That is why, we put **great effort and time into researching the lifting needs**, you may have in your company.

Since 1964 we have made lifting solutions customized to the customer's needs – regardless of the company and the challenge.

In other words, **finding and making the right lifting solution is what we are passionate about**, and through the years we have developed unique lifting solutions for companies such as Coca Cola, LEGO and Novo Nordisk – and maybe your company is next in line?

... set them up and **keep them running**

Let us get your lift installed to make sure that you are **off to a good start**. Even though our solutions are made with high **quality components and excellent craftsmanship** mishaps do happen and nothing lasts forever which is why we offer spare parts and service.

Installation and spare parts

Save yourself the hassle of installing your lift and let us do the dirty work.

Spare parts are just a call away. We will ship it as quickly as possible.

Service provided

There are different possibilities for service for your lifting table depending on where you live.

In England, the Netherlands, and Denmark, we offer full service packages.

For the rest of the world please contact your local TRANSLYFT agent and let them tell you more.

TRANSLYFT was established in 1964 and is Denmark's largest developer and manufacturer of hydraulic lifting tables. At TRANSLYFT we know that every lift is unique, and we work closely together with our customers – from insight to finished solution.
